SUMMARY

AI and Data Science enthusiast pursuing a BSCS degree with hands-on experience in Machine Learning, Data Analysis, and predictive modeling using Python and Scikit-learn. Built and deployed ML applications using Streamlit, Gradio, Docker, and Hugging Face Spaces, with a strong foundation in data preprocessing, model evaluation, and real-world problem solving.

SKILLS

ML / AI
Scikit-learn, Linear Regression, Logistic Regression, Decision Tree, Random Forest, TF-IDF, Label Encoding, Pickle, Joblib

Deployment
Gradio, Streamlit, Hugging Face Spaces, Docker, Google Colab

Data Science
Pandas, NumPy, Matplotlib, Seaborn, EDA, Feature Engineering, Data Preprocessing

Tools
Git, GitHub, VS Code, Kaggle, WordPress, Vercel

Languages
Python, JavaScript (ES6+), HTML5, CSS3

Web Development
React.js, Tailwind CSS, Bootstrap, Firebase

PROJECTS

SMS Spam Classifier
Python, Scikit-learn, TF-IDF, Logistic Regression, Gradio, Hugging Face Spaces
- Built a binary NLP classifier that detects spam vs. ham SMS messages using Logistic Regression trained on a TF IDF vectorized corpus, achieving reliable real-world predictions.
- Designed a consistent text-preprocessing pipeline - lowercasing, punctuation removal, digit stripping - applied identically at training and inference time to prevent data leakage.
- Serialized the model and vectorizer with Joblib; deployed as a public Gradio app on Hugging Face Spaces.

Live Demo: huggingface.co/spaces/Maknoon-Zia/sms-spam-classifier

Crop Yield Predictor
Python, Scikit-learn, Multiple Linear Regression, Pandas, Streamlit, Docker, Hugging Face Spaces
- Trained a Multiple Linear Regression model on 23 years of Indian agricultural data (Kaggle, 1997-2020) to predict crop yield in tons/hectare from 8 input features including rainfall, fertilizer use, pesticide quantity, crop type, and season.
- Applied LabelEncoder for 3 categorical features and packaged 4 model artifacts (1 regression model + 3 encoders) for portable, reproducible deployment.
- Containerized with Docker and deployed to Hugging Face Spaces; Streamlit UI includes metric cards, LaTeX formula rendering, and an automated yield performance rating (Excellent / Good / Average / Poor).

Live Demo: huggingface.co/spaces/Maknoon-Zia/crop-yield-predictor

Pizza Delivery Time Predictor
Python, Scikit-learn, Linear Regression, Matplotlib, Gradio, Hugging Face Spaces
- Created an interactive Linear Regression app that trains on user-provided distance/time data in real time with a configurable train/test split, then predicts delivery time for any input distance.
- Rendered dual Matplotlib visualizations (scatter plot and annotated regression line) and reported full model metrics - slope, intercept, MSE, R^2 - with automatic fit-quality labelling.

Live Demo: huggingface.co/spaces/Maknoon-Zia/pizza-delivery-predictor

TRAINING & EXPERIENCE

Artificial Intelligence Trainee - SMIT (Saylani Mass IT Training Program) 02/2026 – Present
Currently undergoing training in Artificial Intelligence, focusing on Python, Machine Learning, Data Analysis, and AI tools. Gaining practical experience in data preprocessing, predictive modeling, and AI-driven problem solving through hands-on projects.

Web Development Trainee - SMIT (Saylani Mass IT Training Program) 01/2025 – 12/2025
Completed intensive hands-on training in modern web development technologies, including HTML, CSS, Bootstrap, JavaScript, React, Git, GitHub, Firebase, and deployment platforms. Developed responsive websites and practical projects while following industry standard development workflows.
View Certificate

EDUCATION

Bachelor of Science in Computer Science (BSCS) 11/2023 – Present
Govt. Graduate College Faisalabad, Pakistan
- CGPA: 3.83 / 4.00 | Current Semester: 6th

LANGUAGES

- Urdu
- English
