PROJECTS

QuoteKeeper - Full Stack Web Application
React.js, Tailwind CSS, Firebase Auth, Firestore, Firebase Hosting
- Designed and launched a full-stack web app where users register, log in, and manage personal quote collections with real-time Firestore persistence and instant UI updates.
- Implemented Firestore security rules to enforce authenticated-user-only access, applying backend security principles from the ground up.
- Deployed to Firebase Hosting; production app is live and publicly accessible.

SaaS Landing Page
HTML5, CSS3, Responsive Design - Desktop / Tablet / Mobile
- Built a multi-section SaaS product landing page with independent, fully optimized layouts for three breakpoints using vanilla CSS - no frameworks.
- Incorporated modern conversion-focused UI patterns: hero sections, feature grids, pricing tables, and call-to-action blocks.

Responsive Portfolio Website
HTML5, CSS3, Font Awesome, Vercel
- Developed a fully responsive portfolio site from scratch. Hero, services, gallery, testimonials, and contact form using semantic HTML5 and CSS3 without any framework.
